Check out this and other cool science experiments at <http://www.stevespanglerscience.com/experiments/> Newspapers are made from trees and trees grow... so it only makes sense that you should be able to grow a newspaper tree. Roll several sheets of newspaper into a tube, make some tears in the tube and BAM! A tall tree grows from the tube. A magical, recycled Christmas tree without all of the hassle and dropped needles.

About Steve Spangler Science...

Steve Spangler is a celebrity teacher, science toy designer, speaker, author and an Emmy award-winning television personality. Spangler is probably best known for his Mentos and Diet Coke geyser experiment that went viral in 2005 and prompted more than 1,000 related YouTube videos. Spangler is the founder of www.SteveSpanglerScience.com, a Denver-based company specializing in the creation of science toys, classroom science demonstrations, teacher resources and home for Spangler's popular science experiment archive and video collection. Spangler is a frequent guest on the Ellen DeGeneres Show where he takes classroom science experiments to the extreme. Check out his pool filled with 2,500 boxes of cornstarch!

Additional Information:

On the education side, Spangler started his career as a science teacher in the Cherry Creek School district for 12 years. Today, Steve travels extensively training teachers in ways to make learning more engaging and fun. His hands-on science boot camps and summer institutes for teachers inspire and teach teachers how to prepare a new generation for an ever-
